

TaskWA — Command Card

pin me in the group

ADMIN — works only when you DM the bot directly

/nudge 07:30 tue @Ravi.Shankar #Group 1 What is the status? /nudges	Nudger — a plain message the bot sends for you, on a schedule. Time first (required — 07:30 · 7:30 · 730 · 0730 · 7.30 · 7:30am · 730pm · 7am all work), then days (mon,wed or 'daily' or omit = every day), then who (@members / #groups), then the message — sent word for word. Reply Y to confirm. /nudges lists them all, numbered; then /nudge 3 08:15 thu reschedules, /nudge off 3 · on 3 pauses/resumes, /nudge delete 3 removes it.
/adduser 971501234567 Ravi Shankar /rename @Ravi Ravi Shankar /members	Register a teammate from your phone — check the number in the Y/N prompt, a typo would register a stranger. Always joins as a member; promoting to admin stays on the dashboard. /rename changes the name the team sees (in group announcements and digests) — two people can never share a name. /members lists everyone with their roles.
/board preview @Ravi.Shankar #Site.B	v1.7. Sends board image(s) to YOUR chat only — never the team.

EVERYONE — the task commands

/add Fix pump @Ravi #group fri !high	New task for Ravi, due Friday, high priority; #group also posts + announces it in that group. Reply Y to confirm — Ravi is then asked to accept it.
/mytasks	Your open tasks, any time.
/board (or /myboard)	v1.7. Your tasks as a picture — 4 status columns. Yours alone.
/list	Every open task you're allowed to see.
/myadd	Open tasks you created for others — with status and blocks.
/help	The full command list (admins DM'ing the bot also get the admin set).
@Ravi.Shankar @Ravi Shankar" #Group.1 #Group 1"	A name or a group with a space in it: dot it, or quote it — curly quotes from your phone are fine. Names and groups follow the same rule. @Ravi or #group on their own are fine when they match only one person / one group.
two Ravis? reply 1 or 2	If a name matches two people (or you mistype one), the bot lists them numbered — "1. Ravi Shankar 2. Ravi Kumar" — and you reply with just the number. It never guesses. Your original message is then carried out as typed. Same for a #group that matches two groups.
1 done	Task 1 finished. You'll get a thumbs-up.
1 in progress	You've started task 1.
1 block reason	You're stuck — say why. The admin is alerted at once.
1 block waiting on @Ravi.Shankar	Hand the block to Ravi — he's asked to release it when his part is done.
1 unblock	A block waits on YOU? This releases it and hands the task back to its owner.
1 reopen	Undo a mistaken 'done'.
1 cancel reason	Cancel a task YOU created (or you're admin). The assignee is told it's off their list.
done	No number needed if you have just one task — or swipe-reply on the task's message.
Y / N	Got a 'New task from ...'? Y accepts, N sends it back to its creator. Silence for 30 min = accepted.

Dates for /add: today · tomorrow · mon...sun · 25/07 — Priorities: !high · !low — Only you (or an admin) can close your tasks.
